<b>説明</b>			
<p>Opening /time_entries/new takes 10s, when we have 1000 users with 2 different groups that one has ~10 users and other has all other users.</p> <p>I have looked into code and it seems I have found the issue, attaching additional info via screens. Basically if project has a lot of users assignable_users enumerates each users permissions by one, creating 2*X (X=number users) sql queries.</p> <p>I'm hosting redmine with help of docker official image.</p> <p>Environment:</p> <p>Redmine version 4.2.1.stable</p> <p>Ruby version 2.7.4-p191 (2021-07-07) [x86_64-linux]</p> <p>Rails version 5.2.5</p> <p>Environment debug</p> <p>Database adapter SQLServer</p> <p>Mailer queue ActiveJob::QueueAdapters::AsyncAdapter</p> <p>Mailer delivery smtp</p> <p>SCM:</p> <p>Subversion 1.10.4</p> <p>Mercurial 4.8.2</p> <p>Bazaar 2.8.0</p> <p>Git 2.20.1</p> <p>Filesystem</p> <p>Redmine plugins: no plugin installed</p>
