**説明**

I am using mail fetch with rake command. Its implemented like it is documented on redmine wiki

This is our script we use:

```
#!/bin/bash
```

```
export PATH="/home/redmine/.rvm/gems/ruby-2.6.8/bin:/home/redmine/.rvm/gems/ruby-2.6.8@global/bin:/home/redmine/.rvm/rubies/ruby-2.6.8/bin:/home/redmine/.rvm/bin:/usr/local/bin:/bin:/usr/bin:/usr/local/sbin:/usr/sbin:/opt/puppetlabs/bin:/home/redmine/.local/bin:/home/redmine/bin:/home/redmine/.local/bin:/home/redmine/bin"
export GEM_HOME="/home/redmine/.rvm/gems/ruby-2.6.8"
export GEM_PATH="/home/redmine/.rvm/gems/ruby-2.6.8:/home/redmine/.rvm/gems/ruby-2.6.8@global"
export MY_RUBY_HOME="/home/redmine/.rvm/rubies/ruby-2.6.8"
export IRBRC="/home/redmine/.rvm/rubies/ruby-2.6.8/irbrc"
export RUBY_VERSION='ruby-2.6.8'
```

```
cd /home/redmine/redmine ;
rake -f /home/redmine/redmine/Rakefile redmine:email:receive_imap RAILS_ENV=production host=[MAILHOST] username=[USER] password=[PASS] tracker=support project=ticketqueue due_date=2021-11-06 no_permission_check=1 unknown_user=create allow_override=all no_account_notice=1 --trace
```

If you need more information, please tell me.

Thank you very much

The log tells me following:

```
Creating scope :system. Overwriting existing method Enumeration.system.
Creating scope :sorted. Overwriting existing method Group.sorted.
Creating scope :sorted. Overwriting existing method User.sorted.
Creating scope :having_mail. Overwriting existing method User.having_mail.
Creating scope :visible. Overwriting existing method Principal.visible.
MailHandler: Validation failed: Due date cannot be blank
```

So I tried it with

- due\_date="2021-11-06"
- due\_date='2021-11-06'
- due\_date=2021-11-06

Unfortunatly, without success. I do not know, where to search or how to find a way that works. Maybe you have an idea?
