説明

If the activity of the parent project is not a system activity, the time entries of the sub-projects are not displayed when the Activity filter is specified in the spent time list of the parent project.

Activity setting of parent project

!{width:600px;border:1px solid grey;}settings-time-tracking.png!

When the Activity filter is not used

!{width:600px;border:1px solid grey;}spent-time-list-without-activity-filter.png!

When using the Activity filter

!{width:600px;border:1px solid grey;}spent-time-list-with-activity-filter.png!

journals

I think the following patch can solve it.

```
diff --git a/app/models/time_entry_query.rb b/app/models/time_entry_query.rb
index 11128cfd6..5fd4790893 100644
--- a/app/models/time_entry_query.rb
+++ b/app/models/time_entry_query.rb
@@ -88,7 +88,7 @@ class TimeEntryQuery < Query
   activities = (project ? project.activities : TimeEntryActivity.shared)
   add_available_filter(
     "activity_id",
-    :type => :list, :values => activities.map {|a| [a.name, a.id.to_s]}
+    :type => :list, :values => activities.map {|a| [a.name, (a.parent_id || a.id).to_s]}
   )
   add_available_filter(
     "project.status",
```

I created a test. I have attached a patch containing #note-1.

Setting the target version to 4.2.4.

Patch committed, thanks!
