Steps:
1) Create two issues and mark one as a dublicate of another;
2) Close "original" issue.

Expected result:
Both issues have status "closed" and done ratio 100%.

Actual result:
Both issues have status "closed" but done ratio of duplicate issue is not changed.

This is the expected behavior if the "Calculate the issue done ratio with" setting in Administration > Settings > Issue tracking is set to "Use the issue field". Because the status field and the "% done" field are completely independent unless the "Calculate the issue done ratio with" is "Use the issue status".

related_issues

copied_to,New,33894,Automatically set done ratio to 100% when closing a issue
