<b>説明</b>			
<p>Hello, I need to see an Issue with all its descendants.</p> <p>Until now the nearest solution I found is filtering by:</p> <p>"Parent task" "contains" ""</p> <p>However this does not displays (by design) the parent task itself.</p> <p>Anyone knows a way to reach this goal?</p> <p>Thank you.</p>			
<b>journals</b>			
<p>I arranged a patch for accomplishing this task.</p> <p>I added 2 operators to operators_by_filter_type for ":tree" filter type.</p> <ul style="list-style-type: none"> <li>• is (inclusive)</li> <li>• contains (inclusive)</li> </ul> <p>These operators are managed both for "Parent task" filter and "Subtasks" filter.</p> <p>This path has been developed on redmine tag: 4.2.3</p> <p>Hope this help.</p>
