説明

1、钉钉群已配置安全网段IP和安全设置，并将WEBHOOK添加到 webhook_listener.rb，然后重启了redmine 还是不能推送通知

webhook_listener Post的代码:

```
def post(webhooks, request_body)
  Thread.start do
    webhooks.each do |webhook|
      begin
        Faraday.post do |req|
          req.url webhook.url
          req.headers['Content-Type'] = 'application/json'
          req.body = {
            "msgtype"=>" text",
            "text"=> {
              "content"=> "#{request_body}"
            }.to.json
          }
        end
      rescue => e
        Rails.logger.error e
      end
    end
  end
end
end
end
```
