説明 After we bring up the image the application comes up fine however we start to see the following error on the logs: The dependency tzinfo-data (>= 0) will be unused by any of the platforms Bundler is installing for. Bundler is installing for x86-mingw32, x64-mingw32, x86-mswin32, x64-mswin32 but the dependency is only for x86-mingw32, x64-mingw32, x86-mswin32. To add those platforms to the bundle, run `bundle lock --add-platform x86-mingw32 x64-mingw32 x86-mswin32`. The dependency ffi (>= 0) will be unused by any of the platforms Bundler is installing for. Bundler is installing for x86-mingw32, x64-mingw32, x86-mswin32, x64-mswin32 but the dependency is only for x86-mingw32, x64-mingw32, x86-mswin32. To add those platforms to the bundle, run `bundle lock --add-platform x86-mingw32 x64-mingw32 x86-mswin32`. The Gemfile's dependencies are satisfied ===== Phusion Passenger(R) Standalone web server started ===== PID file: /usr/src/redmine/tmp/pids/server.pid Log file: /usr/src/redmine/log/passenger.3000.log Environment: production Accessible via: http://0.0.0.0:3000/ You can stop Phusion Passenger(R) Standalone by pressing Ctrl-C. Problems? Check https://www.phusionpassenger.com/library/admin/standalone/troubleshooting/ ===== [N 2022-01-02 14:10:54.4067 39/T5 age/Cor/SecurityUpdateChecker.h:519]: Security update check: no update found (last check in 24 hours) App 132 output: W, [2022-01-02T14:10:55.692906 #132] WARN -- : Creating scope :system. metrics"):
the stack trace keeps printing repetitively.

```

journals

There is no "/metrics" path in Redmine, so it is natural to get an error when you access /metrics. I think something on your Redmine server is accessing /metrics and it is not a problem of Redmine. Please check the configuration of your server.

Please use "forums":/projects/redmine/boards for questions. Issues are used to report a bug, suggesting a new feature, or submitting a patch. Reading "How to request help":<http://www.redmine.org/boards/2/topics/667> may be helpful for you.
