**説明**

The “ Description ” field is automatically cleared when the Redmine web application is used on iOS devices (both iPhone and iPad) via the Safari web browser.

Steps to reproduce:

Launch Safari on iPhone/iPad.

Open Redmine as a web application in it.

Create a new issue with a sample subject and description.

Edit the issue with regard to its subject (don't touch the description).

After you save the change, the description disappears. :-(
