<div>説明</div> <div>I thought of it while reading ticket #36860. There, a console command is recommended for deleting orphaned files - never a good solution in my opinion! Rather, there should be a link in the admin area. This would be especially useful if you don't have access to the console (e.g. Docker/Synology NAS)</div>	
<div>journals</div> <div>Redmine 5.0 has four "prune" tasks. I think it would be even better if some of them are integrated into Administration pages as well. <pre>\$ bin/rake -T   grep prune rake redmine:attachments:prune      # Removes uploaded files left unattached after one rake redmine:tokens:prune           # Removes expired tokens rake redmine:users:prune            # Removes registered users that have not been rake redmine:watchers:prune         # Removes watchers from what they can no longer</pre></div> <div>This ticket is assigned to erp developer.</div>	
<div>related_issues</div> <div>relates,Closed,10253,Better handling of attachments when validation fails</div>
