説明			
<p>The attached patch improves the usability when closing / re-opening / archiving projects by replacing the generic (and not really helpful) confirmation "Are you sure" with a specific question.</p> <p>We also remove the redundant confirmation when deleting a project from Admin Redmine/projects@. When deleting a project, we will always explicitly ask for a confirmation by requiring the user to enter the project identifier using a dedicated confirmation page.</p> <p>The patch should apply on current trunk @ r21522.</p>
