Jump to project dropdown item is misaligned from the project filter field by 1 pixel down as shown on the screenshot. Tested on Safari 15.4 (17613.1.17.1.13).

journals

I have confirmed the issue after updating Safari from 15.3 to 15.4.

Adding the following CSS seems to fix it.

#quick-search form { display: inline-block; }

Setting the target version to 4.2.6.

This fix is not sufficient, as it results in the dropdown item moving 1 pixel upwards after a click.

The attached change looks good to me so far with redmine 5.0.0 on Safari 15.4, Firefox 99.0.1, Chromium 100.0.4896.127.
